

# SPRAY TEXTURE SYSTEM

- Adds slip resistance
- Installs quickly
- Offers lasting durability
- Bonds to new and existing concrete, asphalt and more
- Can be pigmented and/or color-sealed

Residence | Surface Systems of Texas, Houston, TX

Community Pool | Ribkins Company, Aliso Viejo, CA

Concrete Solutions® Spray Texture System by Rhino Linings, also known as trowel knockdown, is a spray-applied texture coat of Concrete Solutions polymer concrete, designed to restore old, stained concrete and provide a decorative, slip-resistant finish over new or existing concrete surfaces. Common applications include residential and commercial areas such as pool decks, driveways, walkways, patios and even vertical surfaces including steps, curbs and seating walls.

The Spray Texture System installs quickly over most existing sound surfaces, reducing the time and expense of installation. It may be integrally colored and color coated to provide a durable, fade-resistant finish. Color and design options are only limited by your imagination, not your budget.

### PRODUCTS YOU MAY NEED:

- Texture-Top™ Bag Mix
- Resurfacer Bag Mix
- Integral Color Paks
- Concrete Colorcoat
- Hopper Gun
