By  **Rhino Linings**

The Concrete Solutions® Spray-Top® System is designed to renew and recolor new or existing concrete, foam and other sound surfaces. It is spray applied, much like a thin coat of paint, so that the existing surface texture is preserved. The restored surface can later be colored and sealed to create a like-new finish.

Popular Spray-Top System applications include stamped and smooth concrete surfaces, stenciling and decorative designs and logos, restoration of concrete walls or furniture and over foam shapes to create a smooth, cementitious appearance. With such a wide variety of applications, Spray-Top is unlike any other concrete resurfacing system on the market.

#### PRODUCTS YOU MAY NEED:

- Spray-Top Bag Mix
- Resurfacer Bag Mix
- Integral Color Paks
- Polymer Concrete Retarder
- Antiquing Color Powder
- Spray-Top Machine
